Lab #5

1. What is the difference between the following two declarations?
        int *p[10];
        int (*p)[10];

    answer: the difference between these two is the top one is an array of pointers and the
    bottom one is a pointer to an int array.

2. How will you explain the following two declarations?
        int (*p)(char (*a)[]);
        int *p(char(*a)[]);

    answer: the top one is a pointer to a function and the bottom is an array of pointers

3. In zip file.

4. All of these should print the same things which will be Alfred Morino, 496-50-2260, 50, 170.5,
   and 70.5.
